COAL TAX HARD
NUT TO CRACK

London, May 3.—The debate on
the coal tax began in the House of
Commons yesterday (Thursday), but
the fate of the measure is in doubt.
Mr. Balfour was determined to get
a vote on the coal tax before the
House rose, and he rejected Sir Wil-
liam Vernon Harcourt's private appeal
for a postponement. At a late hour,
however, so many members were
anxious to speak that the Speaker
gave it to be understood that he would
not consent to an application of the
closure. The Government was, there-
fore, reluctantly compelled to yield.
The result of the division is by no
means certain. Sir Michael Hicks-
Beach's strong and effective speech in
defense of the tax delighted his col-
leagues. At the same time it was felt
that he gave an unsound argument
when he pleaded the enormous profits
of the coal owners as a justification
of the new tax. It is pointed out
that the Radicals used the same argu-
ment when demanding the taxation of
ground rents, and that if large profits
justify attacks, lean profits would
equally justify state assistance.

There was a large attendance in
the House of Commons today in an-
ticipation of the discussion on the
new export tax on coal.

Sir William Vernon Harcourt, Lib-
eral, led with a severe, almost violent,
arraignment of the Government. He
said the tax would throw the coal
trade into chaos and confusion. It
was nonsense to say the foreigner
would pay the tax because he would
not do without coal. The Govern-
ment of Italy had answered that plea
by taking coal from America instead
of this country. The trade of France
was equally divided between this
country, Germany and Belgium.

The Chancellor of the Exchequer,
Sir Michael Hicks-Beach, interrupt-
ing, said: "We are beating the
others."

"Then go on beating them," said
Sir William Vernon Harcourt. "Why
throw a shilling into the scale against
this country?" Sir William contended
that it was class legislation and
that the tax would ultimately come out
of the miners' wages.

The Chancellor of the Exchequer
admitted that the tax, like every tax,
was an obstruction to trade. The
real question was, Could the export
trade in coal bear the tax? It could,
English coal was of such quality,
there was much of it, and it could not
be got in any other country, that, to a
large extent, it was free from competi-
tion.

The Chancellor submitted masses
of statistics, which he summarized as
showing that 225,000,000 tons were
mined in 1900, on which £18,000,000
in wages was paid.

STRIKES OF MAY DAY

San Francisco, May 3.—The
first of May was made a day for trade
union demands.

Twelve hundred machinists in Buf-
falo, N. Y., and probably 300 more in
Erie county outside of Buffalo struck
to secure a nine-hour day without a
decrease of pay. It is understood
there that the local movement is the
forerunner of a strike that may extend
all over the United States, Canada
and Mexico, on May 20, when a gen-
eral demand for a nine-hour day will
be made.

The strike of the marine engineers
is practically settled on a basis of
mutual concessions. It is expected
that all boats will be ready to go into
commission on the lakes in a very few
days.

All the bricklayers and masons of
Elizabeth, N. J., to the number of
400, went on strike. At Yonkers 750
bricklayers, plasterers, stone-masons
and hodcarriers went out.

Strikes have occurred in the build-
ing trades at Waterbury, Conn.;
Columbus and Youngstown, O.; In-
dianapolis, Ind., and Grand Rapids,
Mich.

The Illinois Central Railway declin-
ed to grant a nine-hour work day to
the union machinists working along its
lines. The company absolutely refus-
ed to consider any compromise on this
question.

Concessions made on both sides at
East Liverpool, O., between the man-
ufacturing potters and the operators,
averted a threatened strike that would
have affected ten thousand workmen.

AMERICANS INDEPENDENT.

Washington, May 1.—The lega-
tion guards at the American legation
at Peking will not be subjected to the
orders of any foreign general. The
American legation guard will retain
its independence even if it is neces-
sary to that end to remove it from
Peking to China. The latter course
might become necessary in case one
of the powers formally declares war
upon China.

The U. S. tug Itouguels is on the

marine railway preparing for her survey
trip on which she will leave as soon as
Captain Merry, commandant of the
Naval Station here, returns from the
Coast.
